

Identify, mitigate, and respond to compliance risks by using the tools you already own

Mitigate Compliance and Privacy Risks Activator

Partner-led workshop highlights

- Uses the Microsoft Purview tools and services you already own.
- Establish or enhance your existing risk management and data discovery processes with the capabilities offered by Microsoft Purview.
- Get insight into risky user behavior, mitigate and control identified risks.
- Define the next steps towards organization-wide risk and compliance posture management.
- Improve your privacy and compliance posture.

>> **> 50%** of organizations state that IT and cybersecurity risks are their biggest concern among all risks¹

>> **#1** identifying and assessing risks is the most time-consuming task in risk management²

We live in a time where digital technology is profoundly impacting our lives, from the way we connect with each other to how we interpret our world. The continuous data explosion has increased costs associated with compliance, litigation, and privacy.

The way organizations manage security, identify risks, and maintain compliance has never been more critical

Organizations are looking to do more with less by transforming legal, risk and compliance, and privacy teams from cost centers to delivering business value.

The **Mitigate Compliance and Privacy Risks Accelerator** will provide you with insights to help you take advantage of comprehensive, end-to-end workflows in Microsoft Purview and help you better investigate and respond to risks using tools you already own.

Limited staff and resources to manage compliance and privacy needs at scale, combined with the increasing complexity of regulatory requirements, means having an integrated approach to identifying, mitigating, and responding to risky behaviors is more important than ever.

By engaging, our experts will work with you to:

Help you understand how the Purview products and services you already own can improve your compliance posture and reduce privacy and compliance risks for your organization.

Learn how Insider Risk Management will minimize internal risks by enabling you to detect, investigate, and act on malicious and inadvertent activities in your organization.

Understand how the end-to-end workflow to preserve, collect, analyze, review, and export content provided by eDiscovery (Premium) will help you efficiently manage your organization's internal and external investigations.

Develop a roadmap for an organization-wide deployment of risk mitigation and compliance posture management, using the tools you already own.

Mitigate Compliance and Privacy Risks Activator

1. 1 Risk management market landscape web survey, Gartner, May 2019 (n=500, buyers and influencers of IRM solutions, 1000+ employees).
 2. 2 Deloitte's 2019 survey of risk management.

Assess and Learn

Assess and Learn

Understand what you have and what you need

Gather information about the current state of the Microsoft 365 deployment in your organization, learn about compliance objectives and challenges, and capture data from Microsoft 365 reporting tools to support upcoming activities.

Risk Investigator

Risk Investigator

Get an introduction to Insider Risk detection, investigation, and response

Leverage Microsoft Purview tools and services in conjunction with real-world scenarios to gain knowledge into beginning implementation of these solutions as part of your existing Insider Risk and Data Discovery/Case Management workflows.

Compliance Manager Tenant Assessment

Compliance Manager Tenant Assessment

Accelerate your compliance journey with actionable next steps

Assess your current Microsoft 365 environment against a set of controls for key regulations and standards for information protection and data lifecycle management, based on your needs and objectives.

Define what's next

Define what's next

Explore the next step towards implementing company-wide data protection and governance

Look back at the activities, discuss the user feedback and overall findings, and define next steps towards an organization-wide roll out of Microsoft Purview Information Protection, Data Loss Prevention, eDiscovery (Premium), and Insider Risk Management.

What to expect

By the end of this engagement, experts in Microsoft compliance will provide you with:

- ✓ Insight into the current state of your Microsoft 365 service activation, as well as an overview of your requirements as they relate to Microsoft 365 compliance, governance, data discovery, and risk management solutions.
- ✓ Detailed guidance on suggested improvement actions to help you comply with the standards and regulations that are most relevant for your organization.
- ✓ Operational Microsoft 365 Developer Tenant to be used as a functional reference point for reviewing design decisions or to review settings before transferring into production.
- ✓ A list of recommended activities and next steps that will lead towards a company-wide roll out of Microsoft Purview products and services to protect and govern sensitive data and mitigate compliance and privacy risks.
